

INFOhio CAT 2.0
New Features List
August 2009

New improved searching

- Full searching options available as in Workflows
- Limits such as library, item groups, material types, etc., based on what is in use at your school district
- Additional suggested searches like Lexile searching, along with continued support of reading program search
- HERE library indicates your home library
- Recommended reading, best seller and most popular lists
- *Visual (topical) search* based on items at your school district
- Search history can recall your search in Quick Search
- *Limit search* “remembers” your search from most search screens so it can be further refined
- *Xref and Try these too...* help refocus a search for more or fewer results
- No results goes to a browse list, and spellchecking offers additional alternatives
- Redirect search by author, subject or item close by on the same shelf

More options to manage results

- Total numbers of copies are shown, as well how many of them are currently available
- Brief list provides direct link to external Web site, along with icons indicating what type of enriched content (if purchased) is available
- Items can be placed on hold at the brief results list or full record display, if feature enabled by library.
- You can select a number of options on how the results should display
 - All vs. building only copies
 - Full vs. brief bibliographic information
 - Descriptive vs. unformatted MARC information (librarian’s choice.)

More options to manage your account

- Access can be gained with either user barcode OR alternate ID and PIN
- New tabbed format to show bills, checkouts, holds
- Ability to cancel holds
- Ability to renew checked out items in accordance with library policies, if feature enabled by library
