

Podcasting for PCs With *Audacity*

If you don't have *Garage Band* you will need to:

- download *Audacity* free from <http://audacity.sourceforge.net/>
- download the LAME encoder to export the *Audacity* files at <http://audacity.sourceforge.net/help/faq?s=install&i=lame-mp3> or by following the Help tab on the *Audacity* site and going to FAQ.

For help on how to use *Audacity*, follow the Help tab at

<http://audacity.sourceforge.net/>

And go to the tutorials on the *Audacity* Wiki. There is even a *PowerPoint* presentation for High School on *Audacity*.

For another example of school libraries using podcasts for booktalks, go to the Hopkinton High School and Middle School Library page with their Isinglass 2008-2009 Teen Read Award podcasts. You can even subscribe.
