

**Sirsi libraries:**

- Select SmartPort and then select **"UC-UNIQUE"** as the catalog to which to connect and capture the template record.
- Match and Load replacing **the title control with "C"** (capital C).
- *NOTE: These instructions will identify subfields with a \$ rather than the Sirsi pipe ( | )*

**MultiLIS libraries:**

- If your ITC has loaded the templates into a local bank, you can use "Create and Update Bibliographical Records" to copy the templates as needed, using PF3 "Create a Record" then PF2 "Copy a Record."
- If your ITC has NOT loaded the templates to a local bank, select the menu option, "Search/Export Union Catalog MARC Records." After templates are tagged for export, MultiLIS libraries should select the third load option, **"Load all bibs AND accompanying MultiLIS fields as new records."** (DON'T include bib records in an export that contains templates, unless you wish to load those bibs as new.)

**Stand-alone libraries:** Use the UCAP Procedure.

## Book on CD Template Instructions for Original Cataloging

January 2006

- **A song book on CD should be cataloged using the Music Recording Template**

**Do a title search for BOOK ON CD TEMPLATE. NOTE:** It is recommended that templates be downloaded as needed, as they may be updated from time to time by INFOhio and they could become corrupted if left to reside in a local catalog.

These instructions make certain assumptions regarding the cataloging of this material, and no inferences should be made about cataloging other materials or about cataloging in general.

**Indicator positions will be blank unless otherwise specified.**

**There will be no ending punctuation for the tag unless otherwise specified.**

**(R)** next to a tag indicates the tag may be repeated in the record.

**(NR)** next to a tag indicates the tag may NOT be repeated in the record.

**(R)** next to a subfield indicates the subfield may be repeated within a tag.

**(NR)** next to a subfield indicates the subfield may NOT be repeated within a tag.

**MultiLIS users:**

Press [PF4] key for "Tag to add" prompt; [PF1] key to return to "Tag to modify."

Press [F6] key to remove a tag that has been selected for modification.

**Sirsi users:**

Use **"DELETE"** and **"INSERT"** Helpers to delete or add a tag.

**Sirsi and Other users: It is recommended that you have an online copy of these instructions open to easily utilize the links included in this document.**

## EDITING THE TEMPLATE

Information which appears in bold below requires your attention. That which is not in bold is informational.

## FIXED FIELDS

These fixed field instructions assume your cataloging software provides a list of codes from which to select for fixed fields. If your software does not do this, you can find the more common codes within this document and additional codes at the Library of Congress Web site provided within the text below. The description of the Leader and 008 elements may be abbreviated differently on different library systems. The order of the display may also vary from system to system.

### Sirsi Users

Sirsi does not provide a list for you. Nor does it clearly indicate where the Leader and 008 tag begin and end within the "Fixed Fields" display. The Sirsi system does not label the Leader and the 008 tag as such.

Leader = first five elements of the "Fixed Field" display.

**008 tag = elements immediately following the five elements of the Leader**

Rec_Type	i	Bib_Lvl	m	Enc_Lvl

**IMPORTANT:** When you click in one of the fixed field boxes that accepts more than one character it does not automatically left justify. Be sure to press the left arrow to be sure you are at the left most position when entering data into a fixed field.

Leader This field does NOT need to be edited if doing full cataloging with item in hand.

**008** The codes for the 008 tag are listed below. Edit as indicated in bold.  
Sirsi users will find the 008 tag elements will begin with the 6<sup>th</sup> element in the fixed field from left to right and will begin with Entrdt which must be edited.

If there is no date of publication but a copyright date is available, you may use the copyright date preceded by the letter ‘c’ to identify it as a copyright date. Books on CD can have multiple copyright dates. The one for the CD should be used and not the one on a book or container. IF you need to use the date on the book or container, that date should be bracketed and without the “c.” EXAMPLE: \$c[1992] If the date is unknown, enter within brackets as much of the date as is known, substituting a hyphen for the unknown digits followed by a question mark. - Subfield \$c ends with a period (.), hyphen (-) for open-ended dates, closing bracket (]) or closing parenthesis ()).

If there is no matching heading to display, you will be given the option to create a "Single Entry." **If the authority heading has an author in subfield \$a and the series in subfield \$t or the series title is different than what appears on the book, then you must create a 490 tag with a first indicator of 1 instead of a 440 tag.** Skip the 440 instructions and see instructions for the 490 tag.

Check Library of Congress authorized headings if no authority is provided, <http://authorities.loc.gov>

#### Indicators:

- Subfields \$n and \$p are preceded by a period ( . )
- Subfield \$v is preceded by a space and a semicolon ( ; )
- No spaces are used in initialisms or personal name initials/letters that appear as part of the series title.

EXAMPLE: 440 \$aReading Rainbow

440 4\$aThe Rare book tapes.\$nSeries 1 ;\$v5

#### 490 Series (R)

- MultiLIS has a 1,000 character limit for each field. Therefore, each time the content in this tag exceeds about 14 lines, an additional tag must be created for the additional information.

**Indicators:**

**1<sup>st</sup> 0 = Complete contents**

1 = Incomplete contents (The note is incomplete because **all the parts haven't yet been published.**)

2 = Partial contents (The note is incomplete because the cataloger hasn't filled it in yet; all the items of the set have been published.)

**2<sup>nd</sup> These instructions are for the simplest method of creating a Formatted Contents Note. If you'd like information on using the second indicator and additional subfields see <http://www.oclc.org/bibformats/en/5xx/> and select 505.**

**\$a Formatted contents note (NR)**

**NOTE: That while an author may be entered in a formatted contents note the author's name is not reversed and is not indexed for an author search. To be able to search on author you must create a 700 tag for the author.**

**Punctuation:**

- Space-hyphen-hyphen-space ( -- ) is entered between each item in the contents note. Contents notes may contain prescribed ISBD punctuation, e.g., statements of responsibility are preceded by a space-slash-space ( / ).
- The field ends with a period when the field contains complete or partial contents (1<sup>st</sup> indicator of 0 or 2) unless another mark of punctuation is present or unless the contents continue to another occurrence of field 505.
