GenYES Ohio

GENYES OHIO HELPS STUDENTS:

Develop Problem-Solving Skills

GenYES Ohio offers teachers the opportunity to help their students become problem-solvers, technology leaders, and savvy 21st century citizens.

Become Technology Leaders

With GenYES Ohio, students provide mentoring, content creation, and IT support for their school. They also support their school's technology integration goals.

Earn Certification

Students receive authentic real-time assessments, personalized evaluations, and badges to show skill building. To become certified, students must demonstrate exemplary leadership and significant learning in the GenYES Ohio program.

A TECHNOLOGY-INFUSED CURRICULUM

GenYES Ohio is a technology-infused supplemental curriculum paired with a platform for tracking student-created technology assistance projects. The curriculum supplements provide a basic introduction to technology and STEM careers. Students learn through action while supporting others and completing projects that demonstrate their learning.
