

2 Steps to Stepping Up Student Learning using high quality instructional materials

from

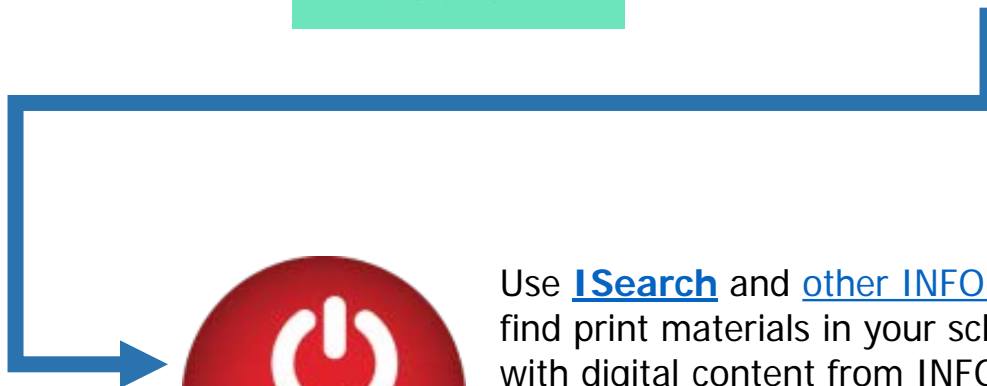

Finding high quality instructional materials that you and your students can use for **free** is an easy two-step process.

Teachers start here:

Use [Educator Tools](#) to find best practices, articles, websites, and media curated by INFOhio, along with lesson plans and other support materials developed by the INFOhio community of users.

Use [Search](#) and [other INFOhio resources](#) to find print materials in your school library along with digital content from INFOhio—including texts, videos, images, and more—that you can print or upload to your learning management system for student use.

It's that easy! Need help integrating those instructional materials into your teaching? Visit [INFOhio Campus](#) and choose the method of flexible training and professional development that works best for you.
