

## Scanning in MobileCirc

When the user and item barcode are available to scan, you can simply use the Bluetooth scanner.

Or, if your Bluetooth scanner is not available, you can <u>use the device's built in camera</u>, or manually type in the barcode number.

## To scan a barcode with the Bluetooth scanner

- 1. Tap into the barcode field.
- 2. Scan the appropriate barcode.

## To scan a barcode with the device's camera

1. Tap the image of a barcode to the far right of the field.

User ID	

2. The camera image will appear at the bottom of the screen.

Aim the red bar over the barcode, until it makes the click sound (image has been captured).
